To whomsoever it may concern

It gives me pleasure and pride to present this letter of recommendation on behalf of Cedars International Group.

Cedars International Group has envisioned to set-up a comprehensive facility to comprise a Medical University Hospital-cum-Medical Industry Techno Park Complex in Dubai. They have chosen a well thought of strategic location in Techno Park (a Free Trade Zone) to house their project. The project has already gone through the assessment of the relevant authorities to achieve their formal approvals.

An important aspect of the project is that it has not only the backing of the Jebel Ali Free Zone Authority & Economic Zone World [the operation of the free zone], but is also equally supported by the Government of Baden Wurttemberg, Germany. As a token of their ongoing support, His Excellency Dr. Wolfgang Schuster, Lord Mayor of Stuttgart, Govt. of Baden Wurttemberg, Germany and Ms. Salma Hareb, CEO of Economic Zone World, has jointly laid down the foundation stone of this project.

Furthermore, I personally know the originator of this whole project, Dr Adnan M. Kaddaha, who by profession is a Doctor, practicing medicine in U.A.E. for almost 30 years now. He not only knows the country's trend with reference to medical practice but also has a keen eye on the socio-economic development of Dubai.

I believe this project will greatly benefit Dubai and its people and would be grateful if Dr Adnan may be accorded due consideration and support in whatever way either technically or financially in turning his vision into a reality.

With best regards,

Sultan Ahmed Bin Sulayem
Chairman
Dubai World
